

## Vaccine Protocol short sheet

### **Pups**

- 6-8 week – DAP [fecal test plus deworm]
- 8-10 weeks – DAP [deworm]
- 12-14 weeks – DAP, 1st non core eg Lepto[ deworm]
- 16-18 weeks – DAP, 2<sup>nd</sup> non core eg Lepto, Rabies 3 year adjuvanted [fecal test]

Cough guard(IN) can be given at any visit

### **Kittens**

- 6-9 weeks – FVRCP, [feleuk test, fecal and deworm]
- 12-14 weeks FVRCP, LEUKEMIA [deworm]
- 16-18 weeks FVCRP, LEUKEMIA [deworm, fecal test]
- 19-21 weeks RABIES 1 year non adjuvanted.

### **Adult dogs**

1. 1 year – DAP , Rabies [fecal, deworm] plus non core applicable. No more than 2 injectable vaccines at one visit.
2. 2<sup>nd</sup> year – Wellness visit[fecal, deworm] and non core vaccine
3. 3<sup>rd</sup> year - DAP – good now for 3 years.; plus non core vaccines applicable[fecal, deworm]
4. 4<sup>th</sup> year – Rabies plus non core vaccines applicable[fecal, deworm]

rotate through vaccines as above

### **Adult cats**

- 1 year – FVRCP, good for 3 years now.
  - LEUKEMIA yearly to 3 years of age
  - Rabies(PUREVAC) yearly[Fecal and deworm]
- 2<sup>nd</sup> year – LEUKEMIA, RABIES [Fecal and deworm]
- 3<sup>RD</sup> year – LEUKEMIA, RABIES [Fecal and deworm]
  - Leukemia now good for 3 years.
- 4<sup>TH</sup> year – FVRCP, RABIES [Fecal and deworm]

Goal is to have a 3-week separation between any vaccine. (To me this is a standard not a Goal, Medical standard, waste of time and money if vaccines are given at a interval of < 3 weeks)
